

## **Technical Data Sheet**

## PaveCoat H<sub>2</sub>O

Description:	PaveCoat H <sub>2</sub> O is a high performance, water based, acrylic penetrating sealer recommended for a wide
	variety of functional, decorative and protective concrete, asphalt and exposed aggregate applications.
	PaveCoat H <sub>2</sub> O seals, colours and protects concrete to provide a durable surface, ideal for pedestrian and
	light vehicle traffic, making it an economical, environmentally friendly and long-lasting choice. <b>PaveCoat H<sub>2</sub>O</b> provides an attractive finish for new and old concrete and comes in gloss as standard.
	Water based, low VOC
	Available in clear and 46 standard colours
	Can be custom colour matched upon request
	<ul> <li>Highly durable</li> </ul>
	Excellent UV resistance
	Resistant to fading
	Non-yellowing
	Resistant to oil and grease
Cafatu	Observe all Occupation Health and Safety (OHRS) presentions
Safety	Observe all Occupation Health and Safety (OH&S) precautions.
Precautions:	Refer to the relevant Safety Data Sheets (SDS) for product safety related information.
	For further information and support: Nutech Paint 03 9770 3000
	https://nutechpaint.com.au/
Provisions:	PaveCoat H <sub>2</sub> O IS NOT suitable to recoat over any existing coatings other than recoating PaveCoat H <sub>2</sub> O finishes.
	Anti-Slip properties: Without the addition of an anti-slip additive. PaveCoat may not be suitable for steep.
	smooth surfaces or areas of high trafficability.

	Nutech Paint
	For a perfect finish!
Tost Datah	
Test Patch:	As surface profiles can vary depending on application where practical, conduct a small test patch in an inconspicuous area to ensure adequate product performance, substrate porosity and provide an indication of the time required to complete project.
Substrate note:	PaveCoat H <sub>2</sub> O is recommended for <u>NEW</u> or OLD <u>UN-COATED</u> concrete surfaces only. Powdery or Soft Concrete: DO NOT Etch or Acid Wash as this may damage the surface.
Application:	Brush, Roller
Notes	Allow a minimum 28 days for new concrete to cure prior to sealing
General:	• For same day sealing, refer PaveCoat Cure & Seal
Substrate:	<ul> <li>Powdery or soft Concrete: <u>DO NOT etch</u> as this may damage the surface</li> <li>Old, Heavily Soiled/ Stained Surfaces: Pre-treat the surface with Nu-EcoSafe Degreaser</li> </ul>
Safety:	<ul> <li>For anti-slip properties that meet AS4586 &amp; AS4663 - P2 or P3 ratings Nutech Paint recommends AntiSlip Mix In. Ideally suited for wet areas, pools, factory loading docks, access ramps (with less than a 5° incline), stairs, entrance foyers, public pedestrian and vehicle areas.</li> <li>For further information regarding anti-slip suitability, mix ratios and standards compliance please refer to the AntiSlip Mix In TDS or Pavecoat Application Guide</li> </ul>
	<b>Note:</b> For steep inclines and gradients greater than 1 in 14, a P5 or R12 rating will be required. Nutech Paint recommends <b>EPiC PolyCryl</b> (Exterior & Interior) OR <b>EPiC Epoxy 500</b> (Interior only) with the addition of the suitable <b>AntiSlip Cast On</b> products for this application. For further information; contact Nutech Paint.
Mixing/ Thinning:	<b>NOTE:</b> It is important to ensure good penetration into the concrete on first coat application.
	Dilute: Clean Fresh water
	Dilute first coat only in accordance with surface profile – Refer Pavecoat H2O Application Guidelines
	<ul> <li>Hardened, Topping Coloured or Smooth Steel Trowelled Concrete: Thin by 50%</li> <li>Rough Stipple Finish Concrete: Thin by 20%</li> </ul>
Preparation:	For full substrate preparation, including <b>Nu-EcoSafe Etch</b> and <b>Nu-EcoSafe Ultra Etch</b> mix ratio recommendations, refer to the hyperlink highlighted below
Equipment:	Roller or Brush
Conditions:	10°C to 30°C ambient, dry conditions. Do not apply if; Rain is likely within 12 hours; it is late in the day or early in the morning. Failure to observe these directions can result in coating damage and surface clouding.
	<ul> <li>Thin in accordance with surface profile</li> <li>Apply 2 even coats observing recoat and drying times</li> </ul>
Application:	For detailed preparation and application instructions, refer to the <u>Pavecoat H2O Application Guidelines</u> available on the Nutech Paint website.
Drying Time Touch Dry:	30 minutes @25°C ambient conditions
Recoat:	2 hours @25°C ambient conditions*
Hard Cure:	7 days DO NOT park vehicles on newly applied PaveCoat for at least 7 days *Drying times will be extended in cooler temperatures or higher humidity.

environment, changes in procedures of use, or extrapolation of data may cause unsatisfactory results.
